

Sustainable bulk adhesive solutions

Why Eco Crates

- **ENVIRONMENTALLY FRIENDLY:**

The only waste produced is the inner liner bag that holds the glue, the crate is fully reusable.

- **SPACE UTILISATION:**

The used crates fold down to a quarter of their filled size, and are then stackable, saving valuable storage space.

- **ECONOMIC:**

A much higher yield of adhesive is achieved from the crates in comparison to IBCs; which have to be drained out.

- **REUSABLE:**

The used crates are collected free of charge after use, and so prove to be a much more cost effective, environmentally friendly option in comparison to single use alternatives.
